	Urgent	Not Urgent
Important	Do - (Your MVP) ● Record stock and options trades (ticker, entry and exit price, quantity bought) ● Automatically calculate profit and loss ● Store and view previous trades with dates and notes	Schedule - (For V2.0+) ● Add a calendar showing daily trades and total profit or loss for each day ● Track performance by options strategy, such as calls, puts, and spreads ● Calculate the average profit and loss for different stocks and options contracts
Not Important	Delegate - (Use a library) ● Use finance to retrieve historical stock prices ● Pandas to organize trade data into a dataframe ● Matplotlib to generate performance charts for visualizations	Delete - (Cut it) ● Add social media sharing so people can share their performance with other investors ● AI based trading recommendations ● Allow for link to brokerage (Robinhood Webull)
